ID:	Study Name:	Principal Contact:	Date of Application: (dd/mm/yyyy)
1	Lifepool	Maxine Dennis	
333	TIG		
566	Health Twist		
568	PMH Demonstration		
573	PathWest LM Demo		
577	IID Demonstration		
580	LEI		
583	SNU Test		

Alternatively if you have a very long list of studies under your management you may use the search palette/panel at the top of the page. You can search/filter by id, name, principal contact, status of the study or date of application. Once you have added your filtering criteria, click the search button;

Once you have chosen your study we will be able to adjust study details or select modules and functions available in that study (for which you have privileges). The module we wish to select is Reports, the Reports function is then the default selection.

Most of our users just run standard prepared reports, which meets their needs. On occasions these pre-canned reports do not match the user's needs, they can use the Data Extraction module to make a fully customized report without needing to know SQL.

For now we will concentrate on each of the standard reports.

To run a report, simply click the hyperlink to the report you wish to run.

From there you will be presented with fields to filter if necessary.

Select/enter any filters, and the report output type (either CSV or PDF currently). Then Click generate. Depending on the size of the report this could be instantaneous or seconds/minutes in a worst case scenario.
